

Core Competency's

ASSESSMENT SYSTEM

Focus On... **Assessment**

Now create an assessment within a matter of few minutes...

A user-friendly and a unique online assessment solution lets an organization conduct assessments for multiple purposes: selection of right resources, skill gain / gap analysis, product knowledge assessment, promotion examinations, etc.

Core Competency's online assessment engine is fully automated web-based examination software. It can also be deployed off-line eliminating Internet dependencies. Using this software, businesses can quickly create tests to screen potential hires or assess skills of existing employees. This ensures that training is conducted in areas where it is most needed.

Our robust platform offers great flexibility in scheduling test & deliver results instantly and helps in cutting down cost of conducting and evaluating physical tests.
