INNOVATIVE SOLUTION

LMS

*Everything you always wanted to know About Learning Management System*

Meet growing training demands by adopting e-learning and a scalable and robust learning management system.

Core Competency Training and Services Pvt. Ltd. is a leading provider of IT, HR and competency building solutions. Our SCORM compliant Learning Management System (LMS) is highly robust, scalable, secure and yet cost effective. With online as well as mobile accessibility, our LMS provides access to knowledge, training and information, anytime, anywhere and on the go.

Client-Server Integration

Client version of LMS seamlessly integrates with server LMS application and tracks LMS course completions.

Key Features of Our LMS:

Create Learning Plans
Long term plans for learning

Training Matrix Integration
Define training once & create long term training curriculum without manual intervention once configured

Discussion Forum
Offering parallel peer-to-peer learning moderated by subject matter experts

Virtual Class Room
Integration of mentor-to-student virtual training sessions, with whiteboard text & audio-video chat

Integrated Assessment Engine
16 different types of multimedia questions and feedback

SWF Convertor
Common document, media and picture formats as assets, no external authoring tool required

Tracking of external instructor-led, class-based and 3rd-party trainings

Certificate generation on successful completions to substantiate completion of trainings

Easy and quick publishing of courses to individual and/or to group of users

Collaboration Tools
E-mailing, surveys, FAQs and discussion forums
